

# Installation

The install scripts already install ROS for you, these instructions are if you wish to manually install ROS.

For Ubuntu 14.04, you can just follow the normal  [ROS installation instructions](#).

For Linux Mint 17.x, the instructions are mostly the same, here are the steps (derived from <http://insane-on-linux.blogspot.com/2014/10/installing-ros-indigo-on-mint-17.html>):

```
sudo sh -c '. /etc/lsb-release && echo "deb
http://mirror.umd.edu/packages.ros.org/ros/ubuntu trusty main" >
/etc/apt/sources.list.d/ros-latest.list'
wget https://raw.githubusercontent.com/ros/rosdistro/master/ros.key -O - |
sudo apt-key add -
sudo aptitude update
sudo aptitude install ros-indigo-ros-base
```
